

Rides you've *ridden*.

A left-anchored drawer slides over a dimmed map. Sessions are grouped by recency; the active one carries a copper stripe; every row is one tap back to the conversation that produced it. 5 sections: Default Light · Default Dark · Empty · Scrolled · New Confirm.

Five sessions · one *active*

Drawer slid in from the left at 82% width. Newsreader "Rides" title (italic accent) with copper-outline NEW chip; THIS WEEK section label + count; five session rows with Santa Cruz loop marked active via signal-default stripe and tinted row background.

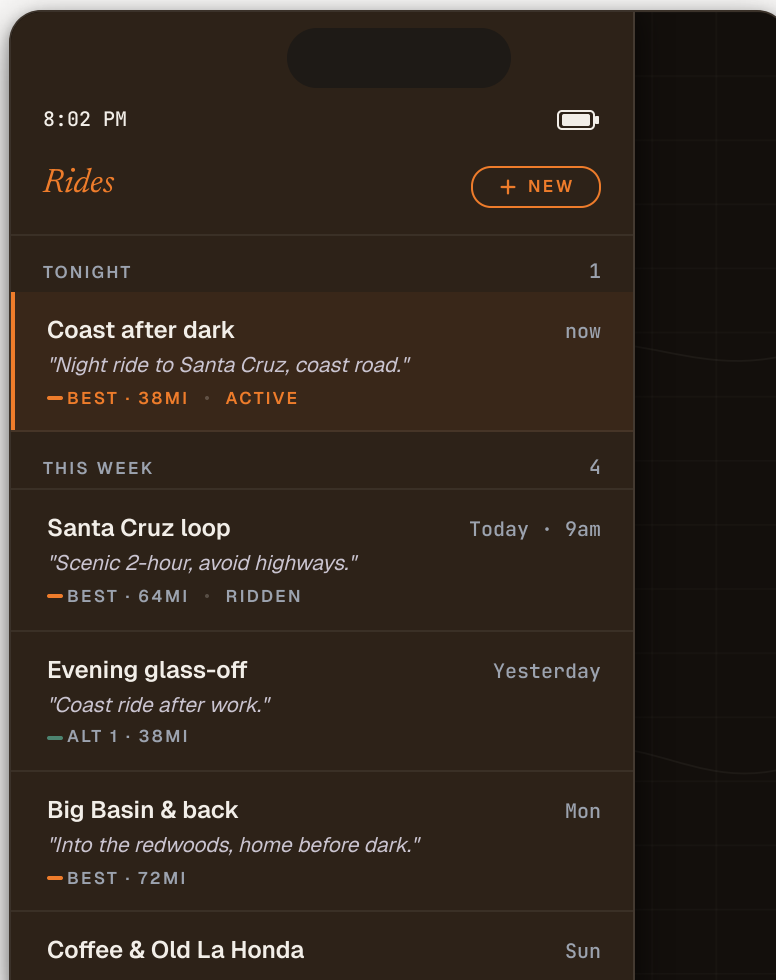

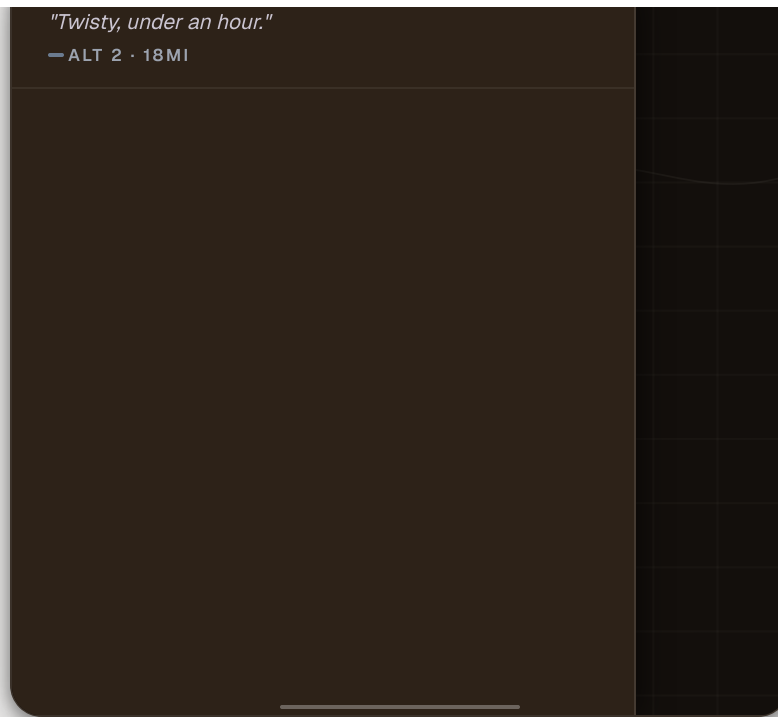

— S02 • Default • Dark

Copper on *ink* — night mode

Warm-ink drawer over a dimmed dark map. TONIGHT group for the active session; THIS WEEK for earlier rides. Copper stripe and signal chips remain identical in hue; drawer surface resolves to surface.card dark token.

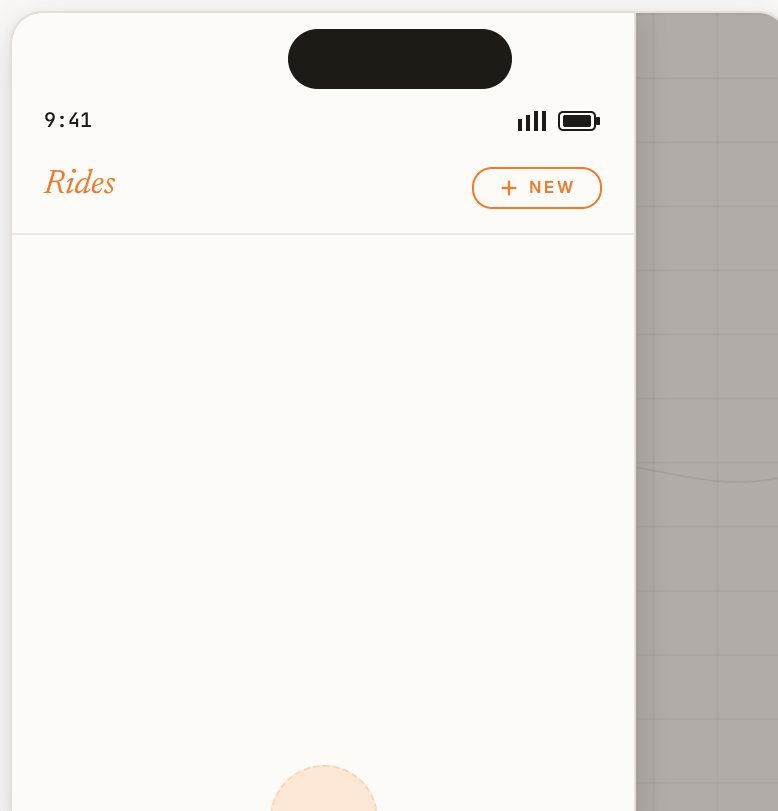

— S03 · Empty · Light

First launch · *no sessions*

Dashed compass icon in copper-whisper circle, opinion-serif headline "No rides yet" with italic "yet" in signal-default, italic prose body, and a primary copper "Plan a ride" CTA that returns the rider to IdleScreen. Drawer header remains consistent with populated state.

No rides *yet*

Your conversations with the Navigator will show up here. Start one and it'll remember.

Plan a ride

— S04 • Scrolled • Light

Long list • *sticky group label*

List scrolled past THIS WEEK group; LAST WEEK group label is now stuck at the top of the scroll area. Drawer header and NEW button remain fixed. Session names from Skyline to the Sea through Calero dam climb.

Confirm *start new session*

Tapping NEW when an active session exists presents a confirmation dialog over the drawer. Scrim dims the entire screen including the drawer. Dialog has opinion-serif headline, italic body explaining that the existing session will be preserved, and Cancel / Start new action row.

Start a *new* ride?

Your current Santa Cruz loop session will be saved. You can always pick up where you left off.
