

Numbers in *mono*, name in *serif*.

The commitment surface. A single polyline on the paper map. Best badge, opinion-serif route title, four instrument columns, six hours of weather, two actions. 6 variants: large detent · mixed weather · dark · medium detent · dismissing · alt route.

Full sheet *exposed* — large detent

The default presentation. Best badge and scenic dots at top; Newsreader title "The Skyline Spine"; four-column mono instrument readout; six clear cells in the weather timeline; outline Save + copper primary "Ride this" action row.

S02 • Mixed Weather • Light

Clear → wind → *rain*

Three conditions across six hours. Cells tint per condition token: clear amber, wind slate, rain blue. An italic Newsreader narration appears below the grid — the Navigator's opinion on the weather front arriving after Davenport.

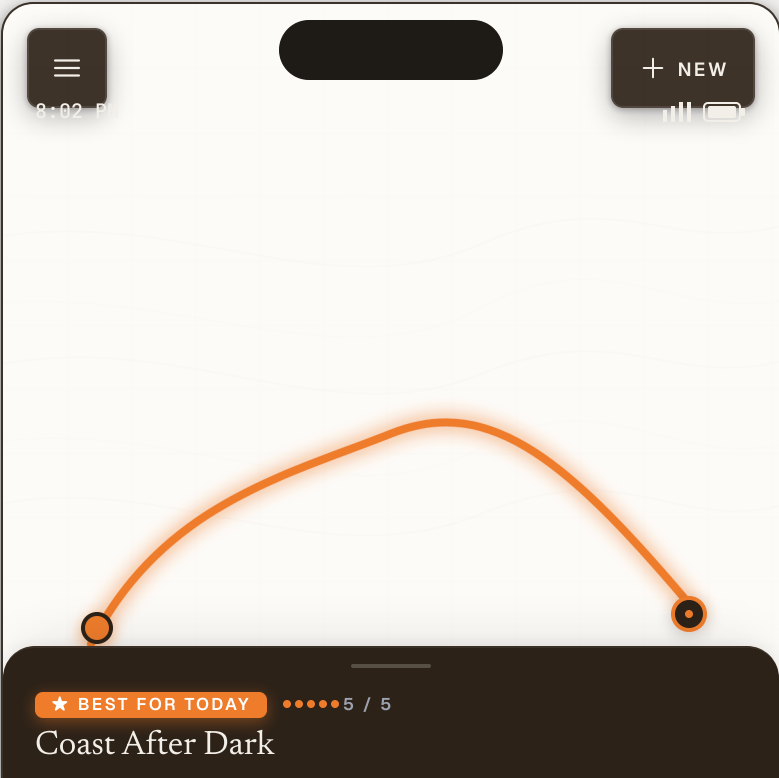

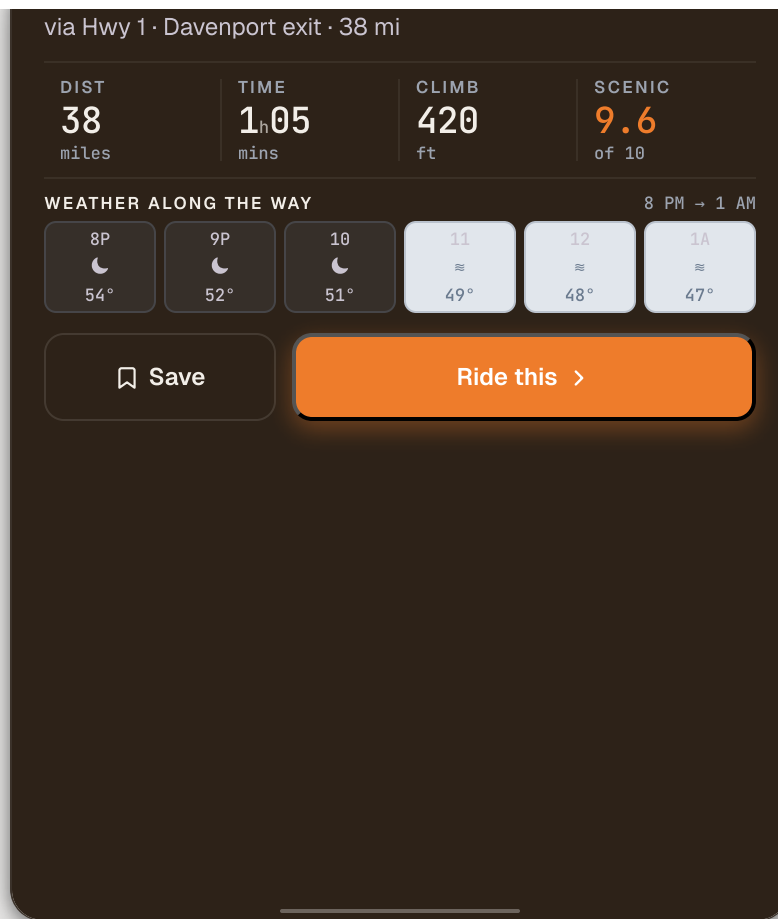

S03 • Default • Dark

Copper glows on *ink* – night ride

Copper signal glows against ink-800 paper. Route polyline gains a stronger drop-shadow bloom. Sheet re-resolves to ink-700 surface. Weather cells use moon icons for night hours; clear-night tint is a cooled neutral. Every token re-resolves — no hard-coded values.

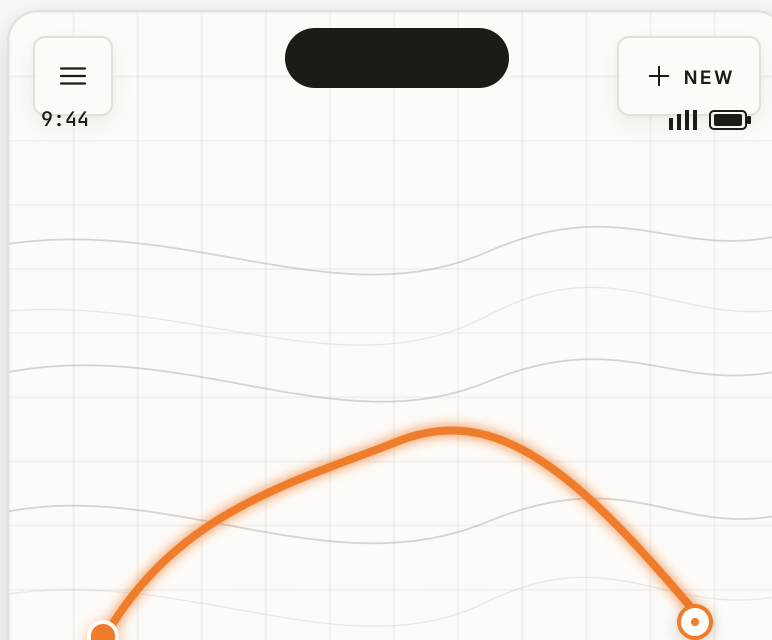

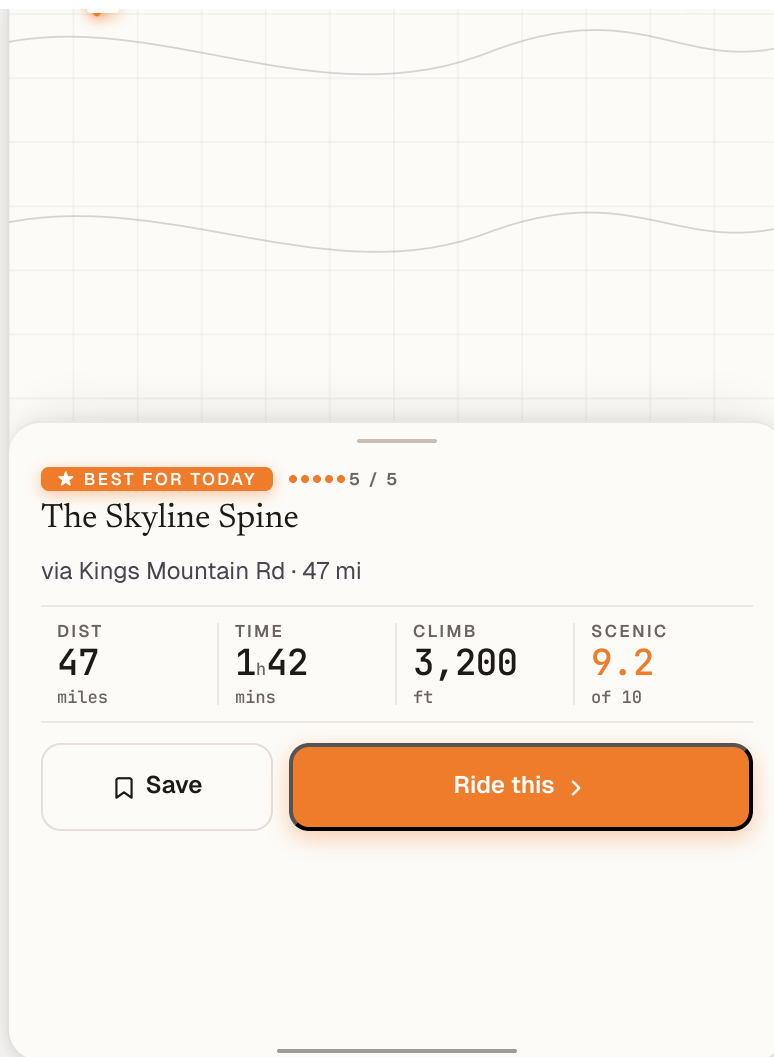

— S04 · Medium Detent · Light

Sheet dragged *down* — map exposed

Rider pulled the sheet down to inspect the map. Weather grid and narration collapse below the fold; header, instrument readout, and action row remain visible. Dragging past the dismiss threshold fires onDismiss.

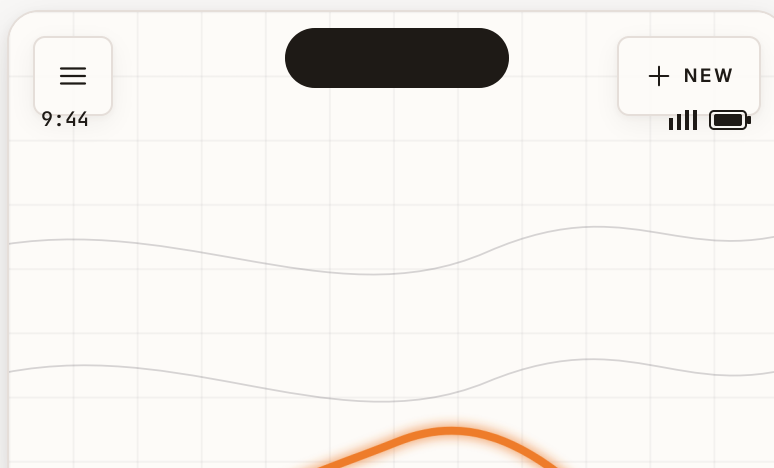

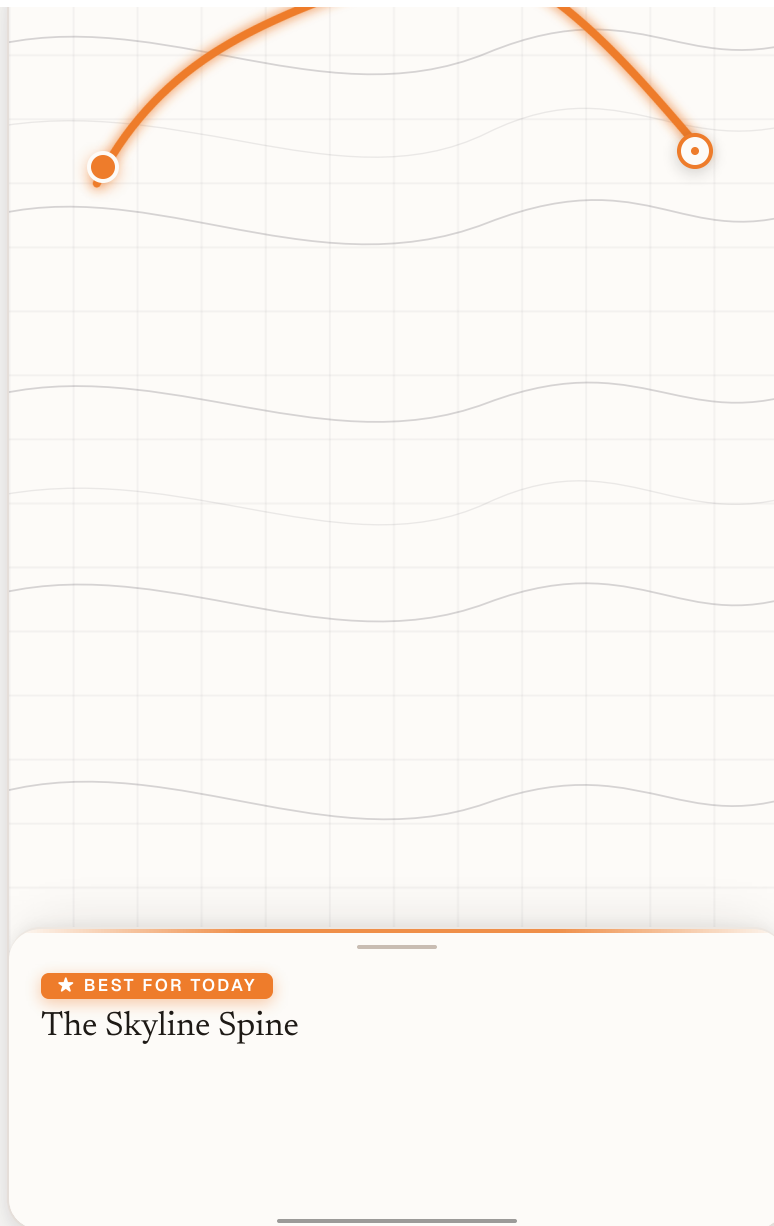

— S05 · Dismissing · Light

Sheet dragged toward *dismiss*

Rider has dragged the sheet past the medium detent, approaching the dismiss threshold. The copper stripe flashes along the sheet's top edge. Sheet is nearly collapsed; the map is fully revealed. Releasing below threshold fires onDismiss; the sheet re-presents.

Toast confirms — *Saved* flips the button

After tapping Save: toast overlay confirms with a copper check; the Save button flips to a copper-tinted filled "Saved" variant; a "Saved" pill appears next to the best badge. "Ride this" remains the primary action.
